

Join our team!!

At Wisewire, we are proud of the work we do and much of the credit goes to the amazing employees and vast freelancer network who turn a vision into an engaging learning experience.

Qualified applicants are asked to send their resume and work samples to:

Careers@Wisewire.com

Current Freelance positions needed:

- **Subject Matter Experts (Freelance)** in:
 - **Health, Safety, Ethics:** Wisewire is creating a one-semester course for an established provider of online courses and seeks contractors to envision and develop a course blueprint, consult on media plan, outline projects, and ensure our materials provide top of the line learning experiences for students. (Multiple positions)
 - **Social Emotional Learning:** The SEL SME will inform and review content about SEL foundations, Sanford Harmony, trauma-informed practices, and self-care. Ideally, this SME is already familiar with Sanford Harmony or is willing to receive training about it. (Multiple positions)
 - **Diversity:** The Diversity, Equity, and Inclusion SME will guide and develop professional training content around bias, cultural inclusivity, and other matters of diversity so that program facilitators can use appropriate practices in the classroom.
 - **After School:** The after school SME will help write and guide content development around after school programming practices that empowers facilitators and caregivers to create a rich learning environment. (Multiple positions)
 - **Lit Art:** The LitArt SME will help write and guide content development around after school programming that utilizes LitArt.
 - **Ready Curriculum:** The READY Curriculum SME will help write and guide content development around after school programming that utilizes READY Curriculum.

- **Scholastic Pre K:** The Scholastic Pre-K SME will help write and guide content development around after school programming that utilizes Scholastic curricula.
- **Scholastic ELA:** The Scholastic Math SME will help write and guide content development around after school programming that utilizes Scholastic curricula.
- **Computer Science:** Wisewire is creating a high school computer science course to cover the CSTA standards for 9th and 10th graders. We are looking for a computer science subject-matter expert (SME) who knows how to write and/or review engaging material for 9th and 10th graders that are aligned to the CSTA standards, spec'ing interactives and hands-on activities for students, and creating authentic projects to assess the skills and knowledge acquired throughout the course.
This is a part time, freelance position. This position will be at least 20 hours per week. (Multiple positions needed)
- **Human Resources:** Our client is a nonprofit organization with after school and summer school programs for underserved populations. They are looking to update and expand their professional development resources for their facilitators by creating a series of online learning modules. Some of those modules focus on HR practices and we are looking for top-level experts to consult on the content we should include.
