Grade 6 Playlist: Statistical Questions

Aligns with CCSS.MATH.CONTENT.6.SP.A.1: Recognize a statistical question as one that anticipates variability in the data related to the question and accounts for it in the answers. *For example, "How old am I?" is not a statistical question, but "How old are the students in my school?" is a statistical question because one anticipates variability in students' ages.*

Related Standards

- CCSS.MATH.CONTENT.6.SP.A.2: Understand that a set of data collected to answer a statistical question has a distribution which can be described by its center, spread, and overall shape.

Objectives

In this module, you will learn and practice the following skills:

- Understand the concept of variability among data.

- Recognize statistical questions.

Let's get started!

Key Terms

- **Statistical questions** can be answered by collecting data with variability.

- **Variability** refers to data points that differ from each other.
